Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 and 7-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herdman or Judd in view of Whiteford.

Both Herdman and Judd show the claimed invention except for the use of a ratchet head, instead of a fixed jaw head, the use of a magnetized head (claim 7) and stop collar (claims 11-16). Whiteford suggests that a driver having a ratchet type of head that can be magnetic and have a stop collar portion. It would therefore be obvious to one skilled in the art at the time the invention was made to modify either Herdman or Judd by using a ratchet head, that can be magnetized and a stop collar because Whiteford suggests the use of these structures in wrenches thus allowing a standard fixed jaw wrench to be more efficient.

The exact shape of the gripping opening of the head is obvious as square, hex, 12-point, and octagonal are all well known shapes and to shape the opening to fit the shape of the nut is obvious. Also to secure the stop collar in any well known manner is an obvious modification.

Allowable Subject Matter

3. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

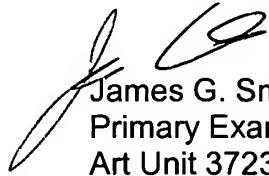

Prior Art

4. The remaining prior art is cited only as of interest at this time.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 571-272-4496. The examiner can normally be reached on M-Th (7:05- 4:35) Fri. off.
